Soil Rehab Specialists Since 1989

Leaf

V0110

INSTRUCTIONS;

- Take samples from the top, middle and bottom of the inside and outside 4 or 5 plants and send them together as one sample.
- If using compost teas, send separate samples from before and after application (or from treated and untreated plants. When sending after-tea samples note the time between treatments and sampling (1/2 hour minimum)
- **Put leaf samples from different treatments in separate bags. Note Breathing into the bag prior to closing will help the leaves to arrive in good condition.**
- Mark the bottle clearly with ID and pack carefully.
- . Send samples by **overnight courier post**.
- Please note that SFI NZ cannot guarantee timely analysis for samples arriving just prior to weekend or public holiday.
- Report will be issued within 10 working days from receipt of sample.
- See www.soilfoodweb.co.nz for more detailed sampling instructions.

LEAF ORGANISM ASSESSMENT: \$50.00 inc GST

This is a basic analysis that enables the grower to know whether the compost Tea will provide the necessary fungi and bacteria in the correct balance for their crop. A written report detailing our findings and suggested measures for application is supplied.
